- **Voice control via Google Assistant**
- Works with IFTTT
- **Notifications via smartphone (push) or mail**
- personalisable **user profiles**

DOBISS NXT

Your home:
always at your fingertips

DOBISS NXT SERVER

Backward compatible and ready for the future

The DOBISS NXT server is 100 % compatible with all DOBISS PRO modules; an upgrade is even possible in one click. Our NXT server will also download updates regularly to benefit from the latest functionalities at all times. Here's how we ensure that your home is ready for the future!

Always more

The functionalities of a home automation system are nothing new; but with DOBISS NXT, you'll get much, much more: more scenarios, more automations, more conditions, more temperature zones, more audio zones and so on...
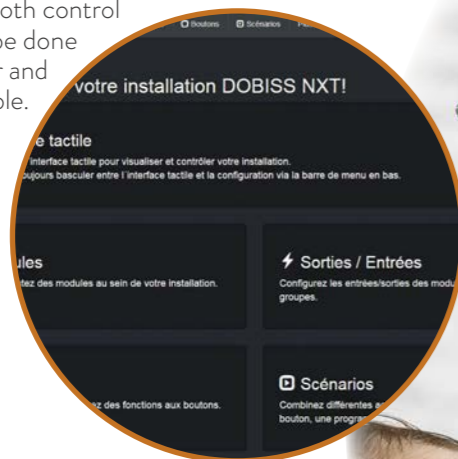

Works with IFTTT

Thanks to the integration with the online service IFTTT (If This Then That) hundreds of other smart devices can be linked to your DOBISS home: sun screens, smart lighting, smart plugs, HVAC units, robot vacuum cleaners, etc.

Works with IFTTT

100% web-based

With the DOBISS NXT server, you don't need any configuration software; go straight to it from your laptop or tablet! Both control and configuration can be done via any Web browser and so are always accessible.

Personalised access

Each user has their own login to the system and hence their own personalised interface. Want to protect access to the settings from your children? Limited access for the baby-sitter? It's all possible with the DOBISS NXT server!

Free Cloud access

Just want to check that the lights are switched off? Want to fire up the central heating quickly before you get home? It's all possible thanks to the Cloud access that's included free of charge on your DOBISS NXT server.

OK Google, switch on the living room light

Control your DOBISS NXT system by voice commands thanks to the integration of Google Assistant. No need to get up: just ask Google to soften the light, open the blinds, turn on the heating or even activate one of your DOBISS scenarios. The combination of the sophisticated voice recognition of Google Assistant and your intelligent DOBISS home offers you the ultimate in comfort at the cutting edge of technology!

works with the Google Assistant

Simple and easy to use

As you would expect with DOBISS, we've made sure that your system is very easy to operate. Change a scenario, modify the function of a push-button, adjust your temperature calendar, etc.; thanks to our intuitive interface, it's done in an instant.
